Projects

ResumeX · Nov. 2020 to Nov. 2020
Fullstack group website, individual can add job description and also upload his/her resume and our website will run some functions comparing job description with resume and inform the user what changes should be made in the resume so it can match job description, or user can choose job search option where our website will take the key words from the resume and search for jobs automatically that matches his/her resume.
Front-end: HTML, CSS using React
Back-end: React, SQL
Link: https://github.com/arsala1995/final_project_LHL

Tweeter · Oct. 2020 to Oct. 2020
Tweeter is a simple, single page twitter clone.
Front-end: HTML, CSS
Back-end: Ajax, node, SQL
Link: https://github.com/arsala1995/tweeter

Sneakers Project · Oct. 2020 to Oct. 2020
Fullstack group website, in which individual can buy and sell sneakers.
Front-end: HTML, CSS
Back-end: Node, Ajax, SQL
Link: https://github.com/arsala1995/sneaker-exchange

TinyApp · Sept. 2020 to Sept. 2020
Full stack web application that allows users to shorten long URLs.
Fron-end: HTML, JQuery
Back-end: Node, Express
Test: mocha and chai
Link: https://github.com/arsala1995/tinyapp

Fixtreet · Mar. 2019 to Dec. 2019
Fixtreet is a project which is a combination of hardware and software, I used tensorflow, website, google maps, ardhuino and several other tools in which I had to make a project which could detect potholes on streets using camera, the camera would detect potholes automatically and would place the information on google maps including size of the pothole, coordinates and would pass it through the database to the website. I got second place in all engineering projects in Kuwait in 2019.
